Delivering Low Cost of Ownership

Mitsubishi Fuso's® all-new Canter® Series commercial trucks redefine everything you want in a business vehicle. They're designed to deliver lower cost of ownership than competitive trucks.

For example, a Canter gets more than 8% better fuel economy than an Isuzu. It also goes further than an Isuzu between service intervals. It even carries up to 2,200 pounds more payload than an Isuzu. Download the 2012 body builder drawings and data for dry freight, refrigerated delivery, stake, dump, contractor and landscaping truck bodies.

The Canter also carries an industry-best warranty that protects not only the engine, but also the entire powertrain, for up to 5 years/175,000 miles. And our warranty is backed by a nationwide network of highly-trained and dedicated dealers.

Canter work trucks will change the way you think about moving your products and business forward, with cost of ownership so low you can measure it by the mile. In fact, if you drive as few as 20,000 miles annually, a properly driven Canter can move several thousand dollars to your bottom line in operating cost savings in just three to four years.

And it's just getting started. Imagine how far its dependable performance and lower cost of ownership can take your business.

- Maneuverability – Tighter turning radius than a Mini Cooper

- Warranty – Industry leading 5-year/175,000 power train warranty
- Fuel Economy – 8.45% better than Isuzu N Series
- Financing – Low as 0.90% APR and no payments for 90 days
- Payload – Haul up to 2,200 more than an Isuzu N Series
